PROFESSIONAL SUMMARY

Motivated and detail-oriented IT professional with hands-on, practical experience supporting network and system operations in a live SOC environment. Comfortable working across Windows and Linux systems, TCP/IP-based networks, and core network services (DNS, DHCP, HTTP/HTTPS, SSH, SMB). Experienced in monitoring system and network performance, identifying and escalating issues, applying patches and updates, and maintaining clear technical documentation. Strong foundation in networking concepts, Linux administration, and troubleshooting, gained through formal training, certification, and applied lab projects. Quick to learn new tools and technologies, with strong problem-solving skills and a collaborative, team-first approach to IT support.

CORE SKILLS

Networking Fundamentals: TCP/IP, DNS, DHCP, HTTP/HTTPS, SSH, SMB, network performance monitoring, network troubleshooting

Systems Administration: Windows Server & Windows security fundamentals, Linux administration, system updates & patch management, routine backups, Docker

IT Support & Operations: First-level troubleshooting, incident monitoring & escalation, IT documentation, inventory management, SLA-driven service delivery, disaster recovery support

Tools & Platforms: Splunk, Microsoft Sentinel, ServiceNow, Wazuh, Wireshark, Nmap, Kali Linux, Python 3, Bash scripting, API integration

Security Awareness: Data security best practices, vulnerability identification, OWASP Top 10, compliance & security protocol documentation

INTERNSHIP EXPERIENCE

IT Support Intern – TechByHeart, Kochi, Kerala **Jan 2026 – Jul 2026**

Supported day-to-day monitoring, troubleshooting, and documentation of IT and network infrastructure

- Monitored network and system performance across SIEM and log sources, identifying anomalies and supporting timely first-level response to system and network issues.
- Assisted with system updates, patch management, and routine maintenance tasks to keep infrastructure secure and available.
- Investigated and documented technical issues end-to-end – from initial detection through resolution – and escalated complex cases to senior team members in line with SLA targets.
- Reviewed and maintained IT documentation, including system/security protocols and compliance records, ensuring accuracy and alignment with organizational standards.
- Collaborated with a cross-functional IT team to support data security, system availability, and disaster recovery readiness.

APPLIED PROJECTS

Enterprise IT Lab: Automated Monitoring & Alerting (2026 – ongoing)

- Built a multi-system lab environment for infrastructure monitoring using Wazuh and Suricata, with real-time file integrity monitoring and Python/Bash automation, achieving reliable detection across 6 test scenarios in 5–10 seconds.
- Configured TLS-encrypted, failover-ready agent-manager communication between systems to ensure continuous monitoring uptime.

Network & Endpoint Intelligence Dashboard (2026)

- Developed a Python/Tkinter desktop application integrating multiple threat-intelligence APIs for analysis of URLs, domains, IPs, and file hashes, with automated reporting.
- Delivered a real-time dashboard with automated data extraction, risk scoring, and PDF/CSV reporting for technical documentation.

CERTIFICATIONS

- Certified Ethical Hacker (CEH v13) – EC-Council, 2026
- Advanced SOC Analyst (ASA) – TechByHeart, 2026
- Security Tester (CST) – TechByHeart, 2026
- Networking Basics – Cisco, 2026
- Fundamentals of Networking – Cisco, 2025

EDUCATION

Diploma in Cybersecurity **2025 – 2026**

TechByHeart, Kochi, Kerala

Bachelor of Computer Applications **2022 – 2025**

St. Mary's College, Wayanad, Kerala
