PROFESSIONAL SUMMARY

CEH v13-certified SOC Analyst with hands-on experience monitoring and responding to security alerts and incidents across SIEM, EDR, and NDR platforms. Skilled in investigating, documenting, and escalating security events, tracking remediation to closure, and coordinating with senior analysts and incident response teams. Applies the Cyber Kill Chain and MITRE ATT&CK frameworks to support security monitoring and cyber incident response, with practical exposure to malware analysis, threat vectors (malware, email, and website-based), and OWASP Top 10 vulnerabilities. Consistently delivers services against SLA and quality targets, contributes to SOC continuous improvement initiatives, and communicates clearly with customers, teammates, and management.

CORE SKILLS

Security Monitoring & Incident Response: SIEM/EDR/NDR alert monitoring, cyber incident response, alert triage & investigation, escalation to senior analysts/IR teams, remediation tracking, SLA-driven service delivery

Threat & Risk Frameworks: Cyber Kill Chain, MITRE ATT&CK mapping, threat vector analysis (malware, email, web), IOC extraction, vulnerability identification & mitigation, risk assessments, penetration testing, OWASP Top 10

Security Tools & Platforms: Splunk, Microsoft Sentinel, CrowdStrike, Microsoft Defender, ServiceNow, Wazuh SIEM, Suricata IDS/IPS, Wireshark, Metasploit, Burp Suite, Nmap, OWASP ZAP, SQLmap, Hydra, Gobuster, YARA, Kali Linux

Documentation & Compliance: Security alert analysis documentation, investigation & resolution reporting, compliance reporting, security protocol review

Programming & Systems: Python 3, Bash scripting, API integration, Linux administration, Windows security fundamentals, Docker, TCP/IP, DNS, HTTP/HTTPS, SSH, SMB

SOC ANALYST EXPERIENCE

SOC Analyst — TechByHeart, Kochi, Kerala *Jan 2026 – Jul 2026*

- Monitored and responded to security alerts and incidents across SIEM and log sources, performing reconnaissance and enumeration to identify exploitable vulnerabilities in web applications.
- Investigated security incidents through threat hunting and log analysis, documenting alert analysis, investigation steps, and resolution, and escalating complex cases to senior analysts and incident response teams.
- Supported vulnerability identification and mitigation, assisting with penetration testing and risk assessments under expert guidance to meet service targets and quality standards.
- Reviewed, documented, and updated security protocols and compliance reports, collaborating with the team to align with industry standards and contribute to SOC continuous improvement.

CYBERSECURITY PROJECTS

Enterprise SOC Lab: Automated Threat Detection & Remediation *2026 (ongoing)*

- Built an enterprise-grade SOC lab using Wazuh SIEM, Suricata IDS/IPS, and the VirusTotal API (90+ engines) with real-time file integrity monitoring and Python/Bash automation, achieving 100% detection across 6 attack scenarios in 5–10 seconds.
- Mapped detections to MITRE ATT&CK techniques via a custom dashboard with TLS-encrypted, failover-ready agent-manager communication for continuous threat research.

CID Malware Intelligence Tool (Combat Incident Detection) *2026*

- Developed a SOC-grade malware intelligence platform integrating VirusTotal, Criminal IP, Hybrid Analysis, and URLScan.io APIs for multi-engine analysis of URLs, domains, IPs, file hashes, and APK files to research malware patterns and IOCs.
- Delivered a real-time Python/Tkinter dashboard with YARA scanning, automated IOC extraction, risk scoring, and PDF/CSV reporting for security documentation.

CERTIFICATIONS

Certified Ethical Hacker (CEH v13) — EC-Council, 2026

Advanced SOC Analyst (ASA) — TechByHeart, 2026

Security Tester (CST) — TechByHeart, 2026

Networking Basics — Cisco, 2026

Fundamentals of Networking — Cisco, 2025

EDUCATION

Diploma in Cybersecurity — TechByHeart, Kochi, Kerala | 2025 – 2026

Bachelor of Computer Applications — St. Mary's College, Wayanad, Kerala | 2022 – 2025
